

Kugler KQ-XRN®

“We had too much rain and you saw a lot of yellow corn. But our dryland corn stayed green all year long. Our average yield was 172—and 54.5 on beans.

I was just happy with this fertilizer and I’m going to keep using it.”

Gary Belohrad

Leigh, NE

“I noticed a healthier plant with better drought tolerance and more pod development. There was a yield increase of five to six bushels.”

Dan Nelsen

Moorefield, NE

Its reputation is growing.

Growers across the Midwest are raving about **Kugler KQ-XRN®**—the only slow release nitrogen formulation of its type:

- ▲ A 28% N solution (72% is slow release) that stays on the plant and lasts for weeks
- ▲ The Perfect Delivery System™ for crop protection chemicals
- ▲ Great for foliar application
- ▲ Easy to apply; Equipment friendly

Kugler KQ-XRN: We make it. We sell it. And nobody can match its quality and performance.
