

THE KUGLER DIFFERENCE

As your crop emerges, you can immediately see your plants off to a quicker start with substantially better health to overcome early disease and challenging weather conditions. KS1022 can also be applied foliar to deliver critical nutrients and key times throughout the growing season. Regardless of the application—in-furrow or foliar—you'll see the Kugler difference.

FERTILIZERS

Kugler Company

We make them. We sell them.
And nobody does it better.

Kugler is a family owned, Midwest based fertilizer company that has been helping agricultural producers succeed for decades. The foundation of that success is based in Kugler's company-wide commitment to the highest quality—from manufacturing to delivery to application, to the training and education we provide your local Kugler KQ dealer, to the innovative, leading-edge technology we bring to the fertilizer industry.

Discover more about how Kugler quality can put your farming operation in step with the rest of your modern farming practices.

THE ORIGINAL
KUGLER

KS1022

IN-FURROW STARTER
OR FOLIAR WITH 30%
SLOW-RELEASE NITROGEN

KUGLER KS1022

OPTIMIZE PLANT HEALTH FROM THE FURROW THROUGH HARVEST

THE IDEAL IN-FURROW STARTER NUTRIENT

Kugler KS1022 is a unique blend of slow-release nitrogen, phosphate, and seed safe water-soluble potassium. KS1022 liquid starter fertilizer is seed safe when applied at the recommended rates. It features a low salt index allowing it to be placed directly with the seed so your plant can get off to a quick and healthy start to maximize yield potential.

KS1022 is specially formulated to apply the correct N, P and K nutrition at the right place - with the seed at planting. The addition of potassium and slow-release nitrogen gives KS1022 an advantage over 10-34-0 and similar products that don't contain K or SRN. The goal of in-furrow fertilizer placement is to maximize root nutrient contact, especially at the early stages of crop/root development. KS1022 placed with the seed allows for quicker germination and a more even emergence setting the stage for higher yields.

PROVIDE KEY NUTRIENTS AT CRITICAL TIMES

Kugler KS1022 is well suited for foliar application also. With the 10% nitrogen being KQ-XRN slow release the P and K can be taken into the leaf right along with the nitrogen. Feeding the plant with N, P and K for up to 6 weeks. KS1022 is well suited to the custom formulation of fertilizer blends and is compatible with many phosphorus, potassium, and micronutrient sources as well as many crop protection chemicals. KUGLER recommends testing for compatibility in all spray combinations by a simple jar test with appropriate concentrations.

KEY BENEFITS OF KS1022

- Can be foliar fed
- Will not settle out when mixed properly
- Highly soluble
- Low salt index
- Nutrient Uniformity in each Drop
- Great mixing flexibility
- Non-Corrosive
