

KS 2075

20-0-7.5-5S

TECH SHEET

GUARANTEED ANALYSIS:

Nitrogen..... 20%
 Urea Nitrogen.....6.0%
 Polymethylene Urea.....14.0%
Potash (K2O)..... 7.5%
Sulfur (S)..... 5.0%

Nitrogen per gallon.....2.20 lbs.
Potassium per gallon.....77 lbs.
Sulfur per gallon.....52 lbs.

Weight Per Gallon.....11.0 lbs.
Gallons Per Ton.....181.8 gals.

KS 2075 contains approximately 70% slow release nitrogen.

MANUFACTURED BY
KUGLER COMPANY • 209 West 3rd; PO Box 1748

CAUTION: KEEP OUT OF REACH OF CHILDREN. Do not get in eyes, on skin or on clothing. Wear goggles, face shield, or safety glasses and rubber gloves when handling. If eye exposure occurs get medical attention immediately. Harmful if swallowed. Avoid breathing vapor. Protect from freezing. Read entire label before using. Wash contaminated clothing before reuse.

WHAT TO DO IN CASE OF CONTACT:

IF IN EYES: Flush eyes with water for 15 minutes, holding eyelids open. Obtain medical attention if irritation develops.

IF ON SKIN: Wash skin thoroughly with soap and water. Get medical attention if irritation develops.

IF SWALLOWED: Drink large volumes of water and induce vomiting by placing finger at back of throat. Call a physician or poison control center.

IF INHALED: Move to fresh air. Obtain medical attention if irritation develops. If contact is made with spray solution containing pesticide(s), follow the "**Statement of Practical Treatment/First Aid**" the pesticide(s) label.

GENERAL INFORMATION:

Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by most crops.

TANK MIXING:

Add ½ total water to tank
Turn on recirculation line.
Add prescribed amount of KS 2075
Add liquid flow able materials
Add any soluble powders.
Bring water to volume and re-circulate before spraying.

PRODUCT INFORMATION:

KS 2075 is a clear liquid containing slow release nitrogen with a superior potassium and sulfur fertilizer solution. The slow release nitrogen means increased crop safety, increased nitrogen absorption, translocation and remobilization when used on field crops. KS 2075 also provides a clear chloride free, safe and efficient source of potassium and sulfur. KS 2075 mixes readily with liquid fertilizers, insecticides and herbicides. However, it is recommended that a compatibility test be used before mixing with specific fertilizers and pesticides.

APPLICATION RATE:

KS 2075 may be applied as a foliar spray, soil applied or injected through a irrigation system. KS 2075 may be applied to most field crops at a rate of up to 5 gallons per acre. Use a minimum of 5 gallons of water per acre. Various environmental and agronomic factors, such as crop stress associated with high temperatures and dry conditions, make it impossible to eliminate all risks associated with the use of this product.

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose on this label when used in accordance with directions under normal conditions of use; but neither this warranty or any other warranty of merchantability of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
